9 TOMMY W. CARTWRIGHT: My name's Tommy W.
10 Cartwright. And I'm against the nuclear dump site at
11 Yucca Mountain for much the same reasons as Clifford
12 Thompson stated.

13 And, besides, I don't want that thing -- that
14 stuff traveling through any of our communities. Having
15 been a fireman EMT, that poses a real danger to -- to
16 local communities and the local fire fighters and the
17 local police.

18 With the situation that's going on in the United
19 States right now, having that stuff travel through
20 communities, even just one or two, is -- it's not safe.

21 I feel that those who create the mess ought to
22 take care of it and figure out how to dispose of it in
23 their own way.

24 A recycling plant has been mentioned. I thought
25 it was in Idaho. But wherever it's at, that should be

0007

1 explored a whole lot further. And it would probably
2 create an industry for somebody to make money. And
3 there's always the possibility of selling it to the
4 other countries that do the recycling, just ship it to

5 them and let them handle it.

6 Like I said, Nevada should not be a garbage

7 dump. I mean we may not have a whole lot of people

8 living here, but those of us here like it the way it is.

9 That's just about all I have to say.
